

Dear Commission:        When considering the petition to limit Satellite Radio's access to the delivery of local weather and traffic reports to subscribers, I hope you will remember the original charge of your bureau to regulate for the benefit of the people, and not bow to special interests for their baser economic concerns. Believe me, they have enough profit potential without limiting drivers' needs to know about the wreck or thunderstorm just down the road from them. Keep America safer and free enterprise free - vote to disallow the petition to limit Saltellite Radio's ability to deliver real services.
